Professional **Front-end developer** with **3 years of experience**, including **1 year contributing to open-source** projects in collaborative teams of 4–6 members. Built complex applications using **React, TypeScript, Redux Toolkit, and Tailwind CSS**. My strong points are **team collaboration**, clean code and dedication, with **1000+ GitHub commits** in the last 12 months.

Hard skills: JavaScript, Typescript, React, Redux, Tailwind CSS, Node.js, MongoDB, Git, Github, REST API integration, responsive Design, HTML5, CSS3.

Soft skills: Analytical thinking, conflict resolution, team collaboration, emotional intelligence, flexibility, problem-solving, reliability.

PROFESSIONAL EXPERIENCE:

Frontend Developer, Chingu (Open Source)

Sep 2024 - present

- Led frontend development for a collaborative full-stack app from concept to deployment.
- Built reusable components to boost UI consistency and deliver better UX.
- Experience working effectively in 4 diverse teams with agile methodologies.

Self-taught Frontend Developer

Sep 2022 - Sep 2024

- Independently learned frontend technologies like React, Redux, Tailwind CSS, and JavaScript.
 - Built 100+ learning projects to steadily improve my skills before contributing to open-source.
 - Developed strong problem-solving skills and a dedication driven mindset.
-

OPEN SOURCE TEAM PROJECTS:

Split Smart App [Live](#) | [GitHub](#)

completed in 7 weeks

- Built a bill-splitting app where users add friends, track expenses, and split costs dynamically.
- Used Redux Toolkit for state management and Tailwind CSS for a modern, responsive UI.
- Developed a custom reusable components and a dark theme.

eBay Clone App [Live](#) | [GitHub](#)

completed in 8 weeks

- Was a part of a team that built a full stack e-commerce app using React, TypeScript, Redux Toolkit, and Tailwind CSS, featuring product browsing, search, filters, and pagination.
- Focused on frontend development including layout, styling, and UX features.
- Worked with colleagues through pair programming, helping create components and fix bugs.
- Came up with the original app idea, which the team voted for and chose as our main project.

Online Dino museum [Live](#) | [GitHub](#)

completed in 6 weeks

- Created an interactive museum with educational exhibits and e-commerce functionality.
- Implemented search, filtering, and checkout for merchandise features.
- Built a REST API with Express & MongoDB, using Redux for global state management.

Pizza ordering app [Live](#) | [GitHub](#)

completed in 4 weeks

- Developed a food ordering system with menu browsing, cart management, and checkout.
 - Solo built a dynamic cart system for adding, removing, and updating items.
 - Used React, Redux Toolkit, and Tailwind CSS stack to create a smooth, responsive UI.
-
